

# Why 3-Day HD?

## KEY CONSIDERATIONS

## 3 DAY MODEL

## 5 DAY MODEL

99% of SNF HD patients utilize this HD model

Allows Nephrologist to maintain continuity of preferred 3-day script

Consistency of treatment for patients returning to their community

Provides patients more time for therapies and social activities

Potential for 2-3 times more patients when compared to 5-day model

Less use of vascular access, lowers potential for infection & complications
